## NOTICE OF ALLOWANCE

### *Allowable Subject Matter*

1. With regards to independent claim 1, the prior art does not disclose or suggest “wherein each of the plurality of asperities are disposed at the textured surface so as to traverse concentric circular paths in response to rotation of the plate about an axis perpendicular to the plate” in combination with the rest of the claimed limitations set forth in the independent claim.

With regards to independent claim 9, the prior art does not disclose or suggest a method of texturing an electrode comprising steps of placing a tool between an electrode and a stop surface, pressing the electrode against the tool such that the tip of the electrode is pressed against the textured surface of the tool and thereby imprinting the texture of the textured surface in the tip of the electrode.

Further searching by the examiner yielded additional prior art as cited in the previous Office Action mailed October 4, 2006. Therefore, it is concluded by the examiner that claims 1-24 of the present invention are allowable.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

Art Unit: 3725
